Urgent update- The two videos linked below help prove that Fukushima Radiation is affecting Pacific Marine life. Dr. Apsley just moved to the east coast and will be getting a new newsletter out soon. We wanted to send a quick update to get these videos to you as soon as possible.

The first video is 22 minutes long and can be found here: [Proof Radiation is Killing the Pacific](#)

The second video is 4 minutes and can be found here: <https://www.youtube.com/watch?v=20HYCDKKKmg>

**At this point, I recommend avoiding the consumption of ALL food caught and harvested in the pacific ocean.**
